Note: The day you load and release a container is considered Day 0. Morning availability is anytime before noon and evening is anything after noon. Whether you have your own equipment or choose to use CPKC to controlled equipment, outbound loads must be in the terminal by the relevant cut to time to ensure departure on the next train. To allow sufficient time to arrive to the shipper's facility and back to the terminal before the cut to off time, you must communicate at least four hours in advance to the Centralized Operations Group (COG) before a load is to be released. Loads released after the notice deadlines may be delayed. Cut off times-time to logate to the terminals to meet the transit time posted.
